

MINI MISSION

Background

Carbon Dioxide, or CO₂, is produced by machines, factories, power plants and even us! But it heats up our planet. Did you know that when we remove carbon dioxide from the air it can have a significant impact on climate change, and stop the planet heating up?

Your mission

Build an idea that removes CO₂ from the air or avoids CO₂ being emitted.

Think big, think small, think wild. Every idea is a good idea!

Be sure to share your ideas with Take Action Global and the LEGO Group, BUT make sure that your photos are only of your creation and don't include anyone's faces.

Submit your idea here: <https://bit.ly/legoschooltohome>
