

MINI MISSION

Background

In order to solve climate change, we need to be able to study places we can't see. Like inside a volcano, another planet, the bottom of the ocean, inside the heart of a whale.

Your mission

Using any creative materials that you have, design a device which allows you to study these kinds of interesting places.

Think big, think small, think wild. Every idea is a good idea!

Be sure to share your ideas with Take Action Global and the LEGO Group, BUT make sure that your photos are only of your creation and don't include anyone's faces.

Submit your idea here: <https://bit.ly/legoschooltohome>
